

# S190

**SOLID BLOCKS**

## **External Walling • Boundary Walling • Load Bearing**

S190 solid blocks are best suited when building **load-bearing** structures, where strength and stability are primary concerns. Constructing with these **heavy-duty** masonry units will guarantee a solid assembly.

Where appropriate, they can also be safely used to erect single-storey structures without column-beam supports.

These blocks are ideal for applications such as external walling, swimming pool and septic tank building, where **high compressive strengths** are required.

**75/-** per pc

### **Specifications**

Dimensions

**190 x 190 x 390 mm**

*Surface coverage*

*74,100 mm<sup>2</sup>*

Weight

**33 Kgs**

Mean Compressive  
Strength

**8.7 N/mm<sup>2</sup>**

Density

**2344 Kg/m<sup>3</sup>**
